

BIOMIMESYS® Liver:

HA: Hyaluronic Acid sodium salt from *Streptococcus equi*.

Galactosamine and RGDS peptide (FN fragment) are synthetic molecules.

Type I collagen is from rodent.

Type IV collagen is from human.

BIOMIMESYS® Adipose Tissue:

HA: Hyaluronic Acid sodium salt from *Streptococcus equi*.

RGDS peptide (FN fragment) is a synthetic molecules.

Type I collagen is from rodent.

Type VI collagen is from human.

BIOMIMESYS® Oncology:

HA: Hyaluronic Acid sodium salt from *Streptococcus equi*.

Type I collagen is from rodent.

BIOMIMESYS® Brain:

HA: Hyaluronic Acid sodium salt from *Streptococcus equi*.

Cationic biopolymer and RGDS peptide (FN fragment) are synthetic molecules.

Type IV collagen is from human.
